CONE ROLLING MACHINE

- The Cone Rolling equipment is used for bending and forming of sheet metal from its flat form to its final form of cone.
- Equipment is capable of forming hollow cone body Small $\varnothing 72$ mm and Big $\varnothing 282$, Length 800 mm
- Size of Machine (length x width x height in mm: - 2500 x 900 x 1700
- Weight: 1490 Kgs

FUNCTION

Prime mover of 5hp motor transmits rotary motion through reduction gear box (ratio 60:1) to 2 support conical shaped rollers via gear and sprocket. Pressure roller of conical shape is placed on top with adjustable height and contact setting. Flat sheet of input material is fed in opening of three rollers on the front side and thereby conical form is produced. Hammering by mallet is done during operation ensuring perfect cone shaping. Other end of equipment has adjustable pivoted bracket opening for product exit. Pressure roller is compensated by a support from bottom in between two support rollers.
